Visual site record

Sample report

Example project

YOUR LOGO

Your company branding

Prepared by: ProjectLens360

Example issue | Week 5 | Reference D01

EXAMPLE

This sample shows the report format. Project names, building references and client branding are omitted.

Pin 01 | Example site photograph

Note to viewer

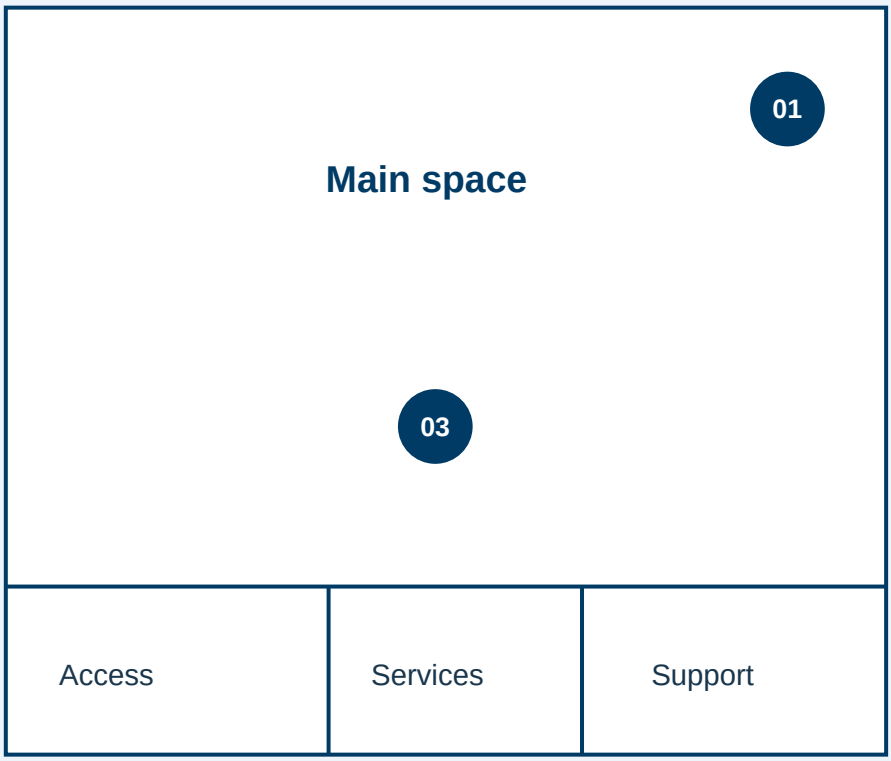

Use the drawing pins to find the recorded location, then explore the photograph and compare the same viewpoint across reporting weeks. In an issued client report, links open the authorised project viewer.

The drawing on the next page is an illustrative layout. It is not the plan of the photographed building and must not be used for construction.

Drawing and viewpoint register

Example project | Illustrative layout

Numbered pins connect a location to its photographs. This simplified diagram demonstrates the format without disclosing the project drawing.

ILLUSTRATIVE DRAWING - NOT FOR CONSTRUCTION

Pin	Example viewpoint	Capture history
01	Warehouse north	Weeks 1-5
03	Warehouse central	Weeks 1-5

Your issued report uses the agreed project drawings, reviewed pin assignments, actual capture dates and your company branding. Missing captures remain clearly marked rather than shifting later weeks.

Sample only. Visual records do not replace inspection, testing or certification.
